(1) The 2005 OY for this group is given as 615 mt in Table 1b from the December 23, 2004 Federal Register, Volume 69, No. 246; however, this erroneously includes 121 mt that was removed from this group in 2003 when the OY was recalculated (due to the availability of updated commercial and recreational data). The correct OY is 494 mt.

(2) This HG was modified at the September 2005 Council meeting from 8.5 mt to 8.6 mt.

(3) This HG was modified at the September 2005 Council meeting from 6.7 mt to 8.5 mt, and from 8.5 mt to 9.4 mt at the November Council meeting.

- (1) The 2005 OY for this group is given as 615 mt in Table 1b from the December 23, 2004 Federal Register, Volume 69, No. 246; however, this erroneously includes 121 mt that was removed from this group in 2003 when the OY was recalculated (due to the availability of updated commercial and recreational data). The correct OY is 494 mt.
- (2) Bolded commercial harvest guidelines indicate that these HGs are lower than those in 2005 even though their respective OYs have either increased or remained the same. This is a result of either a change in the projected take for research or the projected commercial EFP catch.
- (3) Bolded recreational harvest targets indicate that these have increased over those in 2005.
